

We Won't Let Verizon

Wall Off Union Power!

Bargaining is all about power.

As we approach 2008 VZ-East bargaining—which will also set the stage for all VZ-West bargaining, especially on benefits—we've got to rev up our union power at Verizon.

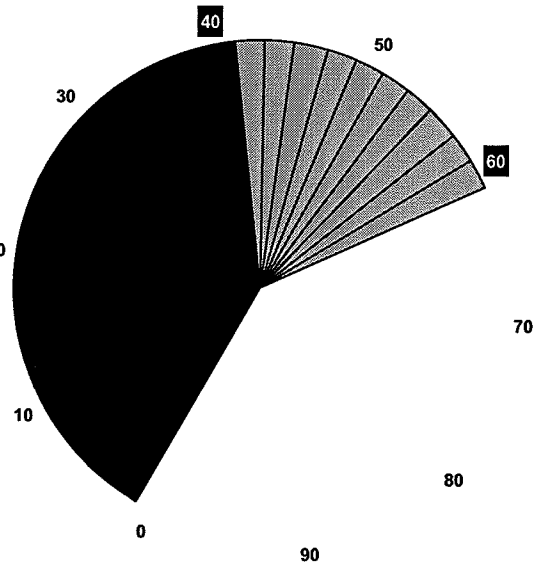

In the last few years, we've beaten back attacks on our health care, won strikes, put more than 3,000 illegally laid-off workers back on the job, and discredited a management campaign to portray us as greedy and ungrateful.

to make us weaker.

Verizon is building a wall between union members and high-growth services in order to lessen our power.

Union Power Meter

We represent 40% of VZ employees. But if all of VZ—including Wireless & Business—were union, we could rev up the union power meter to more than 60%, greatly increasing our power.

TEAR DOWN THE WALL!
